# ROAD SAFETY IN THE KINGSTON DISTRICT COUNCIL, 2010-2014

#### **Road Trauma in South Australia**

The annual number of road deaths and serious injuries is traditionally used as indicator of road safety in South Australia. The South Australian State Strategy has a target to reduce fatalities and serious injuries by 30% by 2020.

There were 108 fatalities recorded on South Australian roads in 2014 this is 11 more than the 97 recorded in 2013, and two more than the previous 5 year average (2009 - 2013) of 106 fatalities. Serious injuries have seen a decrease from 790 in 2013 to 711 in 2014. The previous 5 year average (2009 - 2013) is 928 serious injuries per year.

**Road Trauma in the Kingston District Council** 

Figure 1 – Number of casualties (fatalities, serious and minor injuries) and casualty crashes, 2005-2014

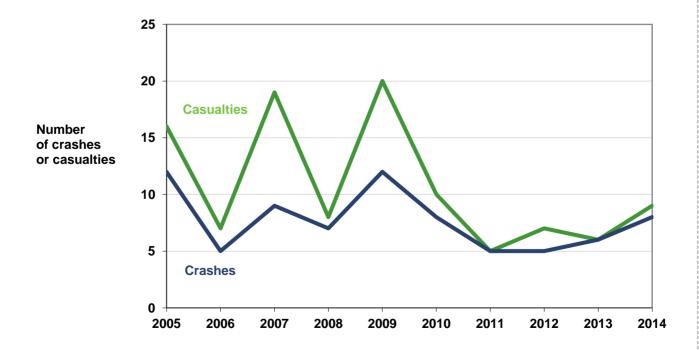

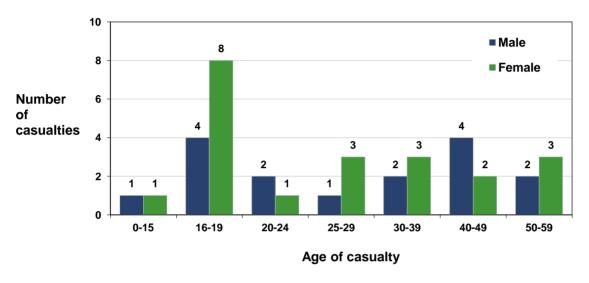

Table 1 - Road crashes and casualties by severity, 2010-2014

| Year  | Casualties |         |       |       | Crashes |         |       |       |
|-------|------------|---------|-------|-------|---------|---------|-------|-------|
|       | Fatal      | Serious | Minor | Total | Fatal   | Serious | Minor | Total |
| 2010  | 0          | 5       | 5     | 10    | 0       | 4       | 4     | 8     |
| 2011  | 1          | 2       | 2     | 5     | 1       | 2       | 2     | 5     |
| 2012  | 0          | 2       | 5     | 7     | 0       | 1       | 4     | 5     |
| 2013  | 0          | 2       | 4     | 6     | 0       | 2       | 4     | 6     |
| 2014  | 1          | 1       | 7     | 9     | 1       | 1       | 6     | 8     |
| Total | 2          | 12      | 23    | 37    | 2       | 10      | 20    | 32    |

Figure 2 - Number of casualties by age and sex, 2010-2014

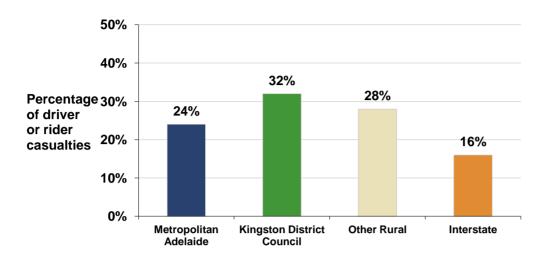

- There were a total of 37 casualties for the 5 year period 2010-2014.
- Casualty numbers were high in the younger age groups for both males and females 16-24 years together, representing the highest numbers. (Note that for the 16-19, 20-24 and 25-29 years are 5 year age groups compared to the older ages which are grouped into 10 year age groups).

Table 2 - Casualties by age and type of casualty, 2010-2014

|                                   | 16-19 | 20-24 | 25-29 | 30-39 | 40-49 | 50-59 | 60-69 | Total |
|-----------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|
| Driver                            | 1     | 9     | 1     | 4     | 3     | 2     | 2     | 22    |
| Passenger                         | 1     | 3     | 2     | 0     | 0     | 1     | 0     | 7     |
| Motor cyclist (including pillion) | 0     | 0     | 0     | 0     | 1     | 1     | 1     | 3     |
| Cyclist                           | 0     | 0     | 0     | 0     | 0     | 2     | 1     | 3     |
| Pedestrian                        | 0     | 0     | 0     | 0     | 1     | 0     | 1     | 2     |
| Total                             | 2     | 12    | 3     | 4     | 5     | 6     | 5     | 37    |

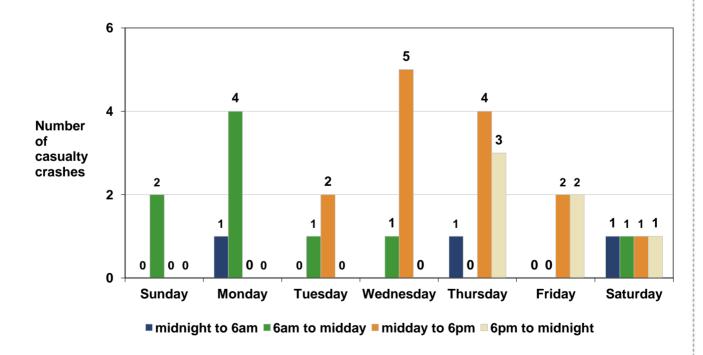

- Like most areas, drivers and passengers (vehicle occupants) make up the majority of road user casualties in the Kingston District Council area.
- Three of the vehicle occupant casualties were not wearing a seatbelt at the time of the crash.

Figure 3 - Residence of driver and rider casualties, 2010-2014

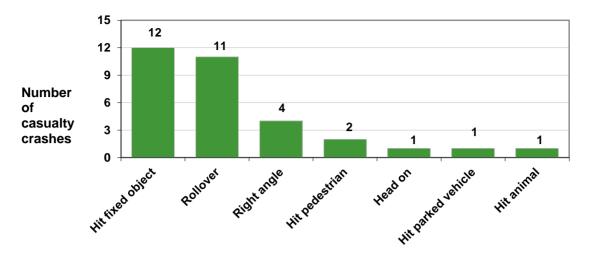

- 32% percent of driver and rider casualties that occur in the Kingston District Council area are residents of the area.
- 24% of all driver and rider casualties in the Kingston District Council area are residents in the Adelaide Metropolitan area.
- 44% are from other rural areas in South Australia or interstate.

Figure 4 - Casualty crashes by time of day/day of week, 2010-2014

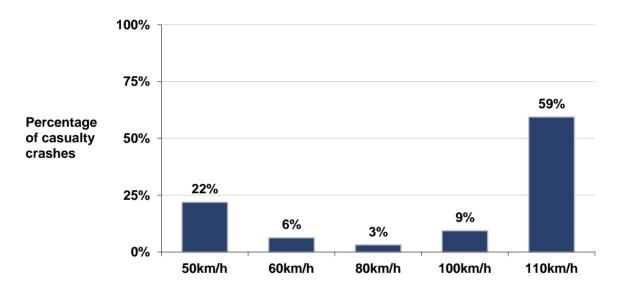

• While crashes can occur at any time, the most common time for a casualty crash to occur in the Kingston District Council area is midday to 6pm on a Wednesday.

Figure 5 - Casualty crashes by crash type, 2010-2014

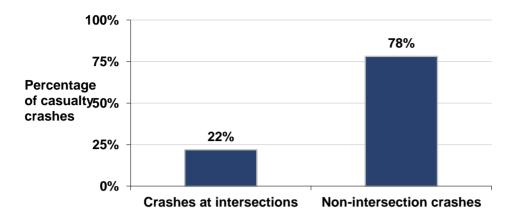

• The majority of casualty crashes are the result of a hit fixed object or rollover crash.

Figure 6 - Casualty crashes by speed limit of road, 2010-2014

• The majority of crashes in the Kingston District Council area occur on roads with 110km/h speed limit.

Figure 7 - Where the casualty crashes occurred, 2010-2014

• 22% of all casualty crashes in the Kingston District Council area occur at intersections, while the remaining 78% occur at 'midblock' sections where there are no intersecting roads.

#### **Distribution of crashes**

The Kingston District Council represents 6% of all fatal crashes and 5% of all serious injury crashes that occurred in the Limestone Coast.

Table 2 – Serious casualty crashes percentage by Limestone Coast LGA, South Australia, 2010-2014

| LGA                       | Fatal<br>Crashes | Serious<br>crashes | % of Serious<br>casualty<br>crashes |
|---------------------------|------------------|--------------------|-------------------------------------|
| Naracoorte Lucindale (DC) | 4                | 26                 | 13%                                 |
| Kingston (DC)             | 2                | 10                 | 5%                                  |
| Robe (DC)                 | 1                | 10                 | 5%                                  |
| Tatiara (DC)              | 7                | 48                 | 24%                                 |
| Mount Gambier (C)         | 3                | 25                 | 12%                                 |
| Wattle Range (DC)         | 10               | 56                 | 28%                                 |
| Grant (DC)                | 7                | 25                 | 14%                                 |
| Total                     | 34               | 200                | 100%                                |

The highest percentage of serious casualty crashes in the Limestone Coast occurred in the District Council of Wattle Range with 28% of crashes occurring there. The district Council of Wattle Range also saw the highest frequency of fatal crashes (29%).

### Definitions for crash and casualty types:

Casualty Crash - A crash where at least one fatality, serious injury or minor injury occurs.

**Casualty** – A fatality, serious injury or minor injury.

Fatal Crash - A crash for which there is at least one fatality.

Fatality - A person who dies within 30 days of a crash as a result of injuries sustained in that crash.

Serious Injury Crash - A non-fatal crash in which at least one person is seriously injured.

**Serious Injury** - A person who sustains injuries and is admitted to hospital as a result of a road crash and who does not die as a result of those injuries within 30 days of the crash.

**Minor Injury Crash** - A crash for <u>at least one</u> person sustains injury but no person is admitted to hospital or dies within 30 days of the crash.

**Minor Injury** – A person who sustains injuries requiring medical treatment, either by a doctor or in a hospital, as a result of a road crash and who does not die as a result of those injuries with 30 days of the crash.

Please note that the Kingston District Council includes the following areas:

Blackford, Bowaka, Cape Jaffa, Keilira, Kingston SE, Marcollat, Mount Benson, Port Caroline, Reedy Creek, Rosetown, Taratap, Tilley Swamp & Wangolina.
