

# Majors Road Interchange

## Project Update – April 2024

### Progress to date

Works are now well underway at the Majors Road Interchange with construction of the new on/off ramps starting to take shape.

On Majors Road, 2km of common service trenching has been completed and the undergrounding of high voltage powerlines is underway. On Majors Road bridge, pile construction has commenced in preparation for the bridge widening.

### Upcoming works

Over the coming months, works will increase on the Southern Expressway, in proximity to the Majors Road bridge, as construction on the bridge widening progresses and construction for the on/off ramps continues.

Road widening works along Majors Road and Adams Road will also continue over the coming months.

### Night works

As part of the project, temporary line marking and barrier placement is required on the Southern Expressway, in proximity to Majors Road, O'Halloran Hill.

To undertake these works safely, works will be undertaken at night, between 7:30pm and 6am from **Sunday 28 April to Saturday 4 May 2024**, weather permitting.

### How does this effect you

During this time, temporary traffic control including lane and speed restrictions will be in place. Please plan ahead and expect some delays.

### Occasional night works

During the project, we will occasionally need to undertake short term night works on Majors Road Adams Road.

We will let you know in advance when these works are required via onsite variable message signs (VMS). Local stakeholders including MFS, will be notified directly in advance.
