Project update

With the Darlington Upgrade Project due for completion late this year, the first few months of the year have been extremely busy as we move into the final stages of construction.

Excavation of the lowered motorway is now 90% complete, with approximately 774,000 cubic metres of soil removed to date.

The lowered motorway is a vital element of the project as it will allow motorists to bypass five sets of traffic signals, including one of the state’s busiest intersections at Main South Road and Sturt Road.

A quarter of the lowered motorway wall panels have been installed and the Tonsley Boulevard Bridge is more than 70% complete, with 1900 cubic metres of concrete poured, 1050 tonnes of steel fixed and the majority of concrete deck pours complete.

In the coming months, we will see some major traffic switches occur, with traffic progressively moved into the lowered motorway and onto the second new Main South Road Bridge and the Ayliffes Road Bridge.

Following these switches, final construction of the Main South Road surface roads and landscaping can occur.
Construction of the Tonsley Boulevard bridge

The project team would like to wish you and your families a very happy and safe Easter! If you are heading away, please drive safely and have a great time.

We would also like to take this opportunity to thank you for your patience and cooperation throughout construction works and we look forward to continuing to work with you.

Our offices and site will be closed from Friday 19 April, re-opening on the morning of Tuesday 23 April.

Traffic switch onto lowered motorway

A series of major traffic switches will occur on Main South Road between the Southern Expressway and Ayliffes Road in the coming months, as traffic is progressively shifted into the lowered motorway.

The new Main South Road bridge which carries northbound traffic over the Southern Expressway and into the lowered motorway will open to traffic as part of the first stage of these traffic switches.

The Ayliffes Road Bridge that will take northbound traffic from the lowered motorway and the Main South Road surface road across the South Road /Ayliffes Road intersection will then open to traffic during the second stage of the traffic switches.

Further information regarding the traffic switches will be provided in the near future.

Happy Easter

The project team would like to wish you and your families a very happy and safe Easter! If you are heading away, please drive safely and have a great time.

We would also like to take this opportunity to thank you for your patience and cooperation throughout construction works and we look forward to continuing to work with you.

Our offices and site will be closed from Friday 19 April, re-opening on the morning of Tuesday 23 April.
