

Glen Osmond Road and Fullarton Road Intersection Upgrade

Project Update

Major construction is now complete and the intersection fully open to traffic.

We would like to sincerely thank the local community, particularly residents and businesses around the intersection, for your patience and understanding during the works to upgrade this important intersection.

You will continue to see some activity around the intersection until March 2024, while we undertake some minor finishing works. These works will include replacement of pavers, local signage, line marking, kerbing, service access cover adjustments and drainage system servicing.

As part of the finishing works, night works will be undertaken intermittently in various locations through and around the intersection from Sunday 7 January 2024, until project completion.

Occasional lane and speed restrictions will be in place to help safely undertake these final works.

Access to properties will be maintained throughout these works, however the project team will contact individual property owners if driveway access is to be temporarily affected by the works.

Some noise disturbance can be expected at times while these works are completed; however, the work will be managed to minimise disturbance to nearby residents and businesses as much as practically possible.

There will be no works on site between Saturday 23 December 2023 and Sunday 7 January 2024.

Campbell Road Traffic Treatment

Thank you to all members of the community who took the time to provide feedback across each stage of the consultation process.

Following presentation to the City of Unley, the Department will review the traffic calming treatments again in mid-2024. This will allow time for the new traffic conditions to normalise, ensuring our traffic monitoring is reflective of how people drive through the area following completion of the intersection upgrade.

We look forward to sharing more information then.
