

# Horrocks Highway Upgrades Wild Dog Creek culvert upgrade

## Early works

### We are improving safety and freight efficiency on the Horrocks Highway

The Horrocks Highway culvert replacement project is jointly funded (80:20) by the Australian and South Australian governments as part of the Bridges Renewal Program.

## What's happening

We are upgrading an existing culvert on the Horrocks Highway, approximately 1km south of Murray Town. This upgrade will improve flood resilience, safety and heavy vehicle capacity along this important freight corridor.

Early works will commence in April 2025, which includes site surveys and the construction of a temporary two-way access track adjacent to Horrocks Highway. The temporary two-way track will ensure construction work can be safely undertaken adjacent to traffic.

## How this affects you

The Horrocks Highway will remain open to traffic while early works are undertaken.

To keep everyone safe lane and speed restrictions will be in place throughout the work area, including outside of work hours where required.

**Following completion of early works in May 2025 traffic will be diverted around the works area via the temporary two-way access track until major works are completed in late September 2025.**

Advance notice will be provided prior to commencement of major works and the change to traffic impacts.

#### When

Thursday 3 April 2025 until late-May 2025

Weather permitting

#### Hours of work

Monday to Friday

7am until 5pm

Some weekend work may be required

#### Where

Horrocks Highway, approximately 1km south of Murray Town
