

Flagstaff Road Upgrade Project

Upcoming works

Works will occur on Flagstaff Road to install additional signage for cyclists and on-road linemarking between Elly Court and the off-road cycle path.

In order to minimise the impact to road users, linemarking is programmed **between 9pm and 6am from Sunday, 30 April, over two nights when weather permits** and additional signage is to be installed on **Friday, 5 May 2023, weather permitting**.

These works are being implemented to further improve safety for cyclists. Investigations into any further improvements to the Shared Use Path are continuing.

Minor works will also occur, at night to upgrade the traffic detector loop on Flagstaff Road, between Hyland Avenue and Main South Road, **on Friday, 5 May 2023, weather permitting**.

To safely undertake these works, speed and lane restrictions will be in place. One lane in each direction will be open to traffic at all times. Traffic management and signage will be in place to alert road users to changed traffic conditions. Every effort will be made to minimise impacts to the community.

Some noise disturbance can be expected at times while these works are completed, however, the work will be managed to minimise disturbance to nearby residents and business as much as practically possible.

There is no change to public transport services. Access for emergency service vehicles will be maintained at all times during these works. Access to properties will be maintained throughout the works wherever possible, with advance notice provided if there is a need to temporarily restrict driveway access.

Whilst there will be some temporary impacts at various locations for pedestrians and cyclists, access will be maintained at all times, with traffic controllers onsite to assist.

Please take extra care when workers are on site. Observe speed limits, lane restrictions and traffic controllers when travelling through the area.

The Department appreciates your co-operation and patience while these important works are undertaken.
