

# Regency Road to Pym Street project

## WORKS NOTIFICATION

September-October 2019

### *Site office establishment and geotechnical investigations*

From early September the R2P Alliance will establish a site office compound and undertake geotechnical investigations on South Road and its side streets, Regency Park and Croydon Park.

#### **Where will the works be located?**

The project's main site office will be located at 326 South Road, between Packard and Hudson avenues, Croydon Park. The site office will house offices, amenities, staff car parking and storage.

Geotechnical investigations, including potholing and pit investigation, will occur project-wide on South Road, Regency Road and local side streets.

#### **How long will the works take?**

The site office will take approximately **two months** to construct weather permitting, with the project team expected to be on site by the end of the year. Construction of the site offices will start in early September 2019 and works will occur during the day.

The geotechnical investigations will also take approximately **two months**. Crews will be in each location for 1-2 days or nights. Works will occur at night where located on South Road or Regency Road, and during the day where located on side streets.

#### **How will the works affect me?**

Efforts will be made to minimise noise impacts to nearby businesses and residents. Some noise will be unavoidable however and may include noisy works at night where they cannot be undertaken during the day for safety or access reasons.

For safety reasons, speed and lane restrictions will be in place where investigation works are being undertaken within the road. Where investigations are required on South Road and Regency Road, they will be carried out at night to minimise impacts on traffic.

Geotechnical investigations in the local side streets will be carried out during the day and some temporary closures to the side streets will be required. Property access will be maintained during the works.

For real time roadwork information download the AddInsight app for Apple or Android or visit the Traffic SA website at [www.traffic.sa.gov.au](http://www.traffic.sa.gov.au).
