

Gawler Rail Electrification Project

King Street Bridge – Upcoming local traffic changes

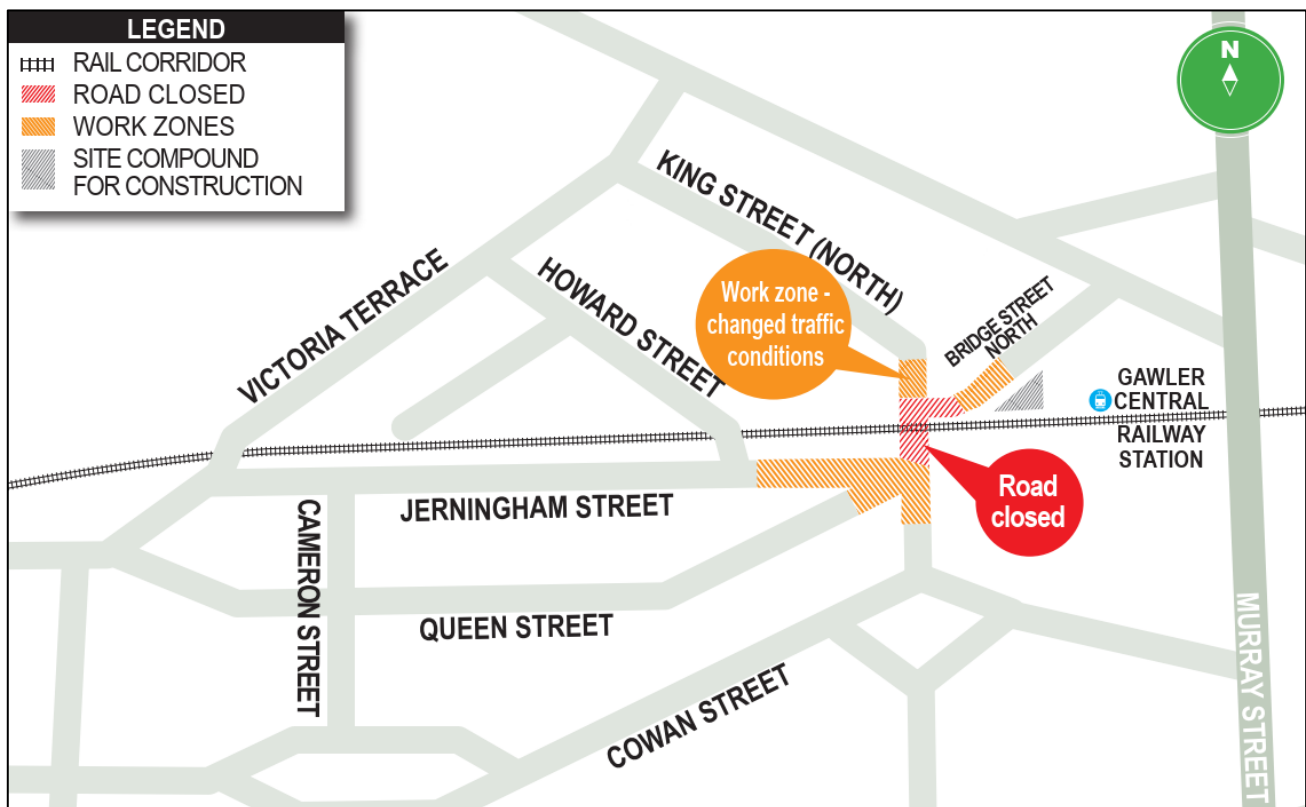

As part of the Gawler Rail Electrification Project, service relocation works requiring regular changes to traffic conditions will be undertaken in the vicinity of the King Street Bridge.

When: Service relocation works will be undertaken from **Sunday, 18 July 2021 for approximately 3 weeks**, weather permitting.

Works will take place from 7am to 7pm, Monday to Saturday and from 8am to 6pm on Sundays as required. Some night works or changes to work hours may be required and residents in the vicinity of these works will be notified in advance.

Location: King Street Bridge precinct, Gawler (refer to map).

Traffic management and detours: Works will require temporary, intermittent local road closures and traffic changes to accommodate the multiple work zones. Traffic conditions will change regularly during this time, and detours will be in place directing motorists and pedestrians to alternative access routes in the local area. Please observe signage, speed restrictions and directions from traffic controllers.

**BUILDING
WHAT MATTERS**

What you can expect: Works will include the removal of existing and installation of new power poles. Work will also be carried out on the existing water main. If any planned interruptions are required to electricity and water services, you will be notified in advance directly by your service provider.

Access to residential properties and businesses will be maintained throughout the works wherever possible, with advance notice provided if there is a need to temporarily restrict driveway access. Every effort will be made to minimise impacts to the community. Works on the King Street Bridge will also continue during this time.
