

Gawler Rail Electrification Project

Victoria Terrace level crossing temporary closure

The Australian and South Australian governments are jointly funding the \$715 million electrification and modernisation of the Gawler rail line to deliver a faster, cleaner and more reliable service, delivering an electrified network through Adelaide from Gawler to Seaford.

As part of this project, the Victoria Terrace level crossing will be temporarily closed to complete overhead wiring works.

Location: works will be undertaken within the rail corridor between Gawler Oval and Gawler Central railway stations. To ensure the works can be undertaken safely, works will include **a temporary closure of the Victoria Terrace level crossing.**

When: in order to minimise the impact to road users, the works will be undertaken between 9pm Tuesday, 26 October and 7am Wednesday, 27 October 2021, weather permitting.

The level crossing will be closed between 5am and 7am on Wednesday, 27 October 2021.

Traffic management and detours: to safety facilitate these works, detours will be in place to direct motorists to alternative crossing points via Jerningham Street and Victoria Terrace (refer to map). Please plan ahead, allow extra travel time and take extra care when workers are on site. Observe speed limits, lane restrictions and traffic controllers when travelling through the area. As part of the project, the King Street Bridge has been removed and is being replaced with a new pedestrian bridge.

Access to local businesses and residences in the area will be maintained during these works. Please continue to support the local businesses. Pedestrians and cyclists are advised to take care when travelling through the area. For safety reasons there may be some restricted access. Where required, signage will be in place to direct pedestrians and cyclists to alternative access and/or detours. Every effort will be made to minimise impacts to the community.

of South Australia

**BUILDING
WHAT MATTERS**

What you can expect: construction plant and equipment including wiring trucks, elevated working platforms and other construction vehicles will be used on site. As work crews move along the railway line, some noise disturbance can be expected at times while these works are completed, however the work will be managed to minimise disturbance to nearby residents and businesses as much as is practically possible.
