

SAMIS Build 13.18

Overview

The SAMIS Build Initiatives & Enhancements Communication Bulletin contains information about business and system changes that have occurred and been released/deployed into SAMIS production.

Details of Enhancements

In SAMIS Build 13.18 the following expected benefits were deployed into SAMIS production:

- **SE-48 Ability to view Facility and Amend assets linked to Facility**
This change allows users with FM access to view and amend assets linked to a Facility that does not have ultimate responsibility to the site.
 - **SE-50 Attribute History**
This change includes the addition of a button currently under [Edit Asset > Attributes](#) to allow users to view changes made to an asset's attributes.
 - **SE-62 Asset Tree Name Issue**
The issue with assets having incorrect asset tree names has been corrected.
 - **SE-49 Equipment Register Link from Asset Details**
This change allows users to click on [Equipment Register](#) on a site to be taken to that site's Equipment Register.
 - **SE-32 Unexpected Error Message Rectification**
SAMIS users were experiencing a number of [Unexpected Error](#) messages when attempting to log in. This issue has now been resolved.
 - **SE-52 Replacement Costs shown on Asset Details**
The replacement cost of an asset is now also shown on the Asset Details screen, where previously it was only able to be viewed under [Edit Asset > Material & Finish](#).
-

Deployment Date

1st March 2017
