

Gawler Rail Electrification Project

Curtis Road level crossing temporary closure

The Australian and South Australian governments are jointly funding the \$715 million electrification and modernisation of the Gawler rail line to deliver a faster, cleaner and more reliable service, delivering an electrified network through Adelaide from Gawler to Seaford. Once complete the electrified line will support increased capacity and future growth for development along the rail corridor and in northern Adelaide.

As part of this project, the Curtis Road level crossing will be temporarily closed to complete overhead wiring works.

Location: works will be undertaken within the rail corridor, between Smithfield and Munno Para railway stations. To ensure the works can be undertaken safely, the **Curtis Road level crossing** will be temporarily closed to all traffic for several hours while works are carried out.

When: works will be undertaken at night to minimise impact to traffic during peak times from Sunday, 22 August to Wednesday, 25 August 2021, weather permitting. Hours of work are between 9pm and 7am.

The level crossing will be closed between 5am and 7am on Monday, 23 August, Tuesday, 24 August, and Wednesday, 25 August 2021.

Traffic management and detours: to safely facilitate these works, detours will be in place to direct motorists to alternative crossing points via Samuel Street and Charlotte Street (refer to map). Please plan ahead, allow extra travel time and take extra care when workers are on site. Observe speed limits, lane restrictions and traffic controllers when travelling through the area.

Access to residential properties and businesses will be maintained at all times.

**BUILDING
WHAT MATTERS**

Pedestrians and cyclists are advised to take care when travelling through the area. Pedestrians will be assisted to cross by staff on site, if safe to do so, or directed to the nearest safe crossing point.

What you can expect: construction plant and equipment including wiring trucks, elevated working platforms and other construction vehicles will be used on site. As work crews move along the railway line, some noise disturbance can be expected at times while these works are completed, however the work will be managed to minimise disturbance to nearby residents and businesses as much as is practically possible.
