

# Gawler Rail Electrification Project

## Bridge Screen Installation Works, Overway Bridge Road, Gawler

The Australian and South Australian governments are jointly funding the \$715 million electrification and modernisation of the Gawler rail line which will deliver a faster, cleaner and more reliable service, delivering an electrified network through Adelaide from Gawler to Seaford. Once complete the electrified line will support increased capacity and future growth for development along the rail corridor and in northern Adelaide.

As part of the Project, bridge safety screens will be installed on Overway Bridge. To safely facilitate these works, Overway Bridge Road must be temporarily closed while this work is carried out.

**When:** Works will be undertaken at night to minimise impact to traffic during peak times from Monday, 27 September to Monday, 11 October 2021, weather permitting. Hours of work are between 6pm and 6am.

To safely facilitate these works, the bridge will be temporarily closed to traffic and pedestrians at these times. It will be reopened to traffic at the completion of each work shift. Pedestrian access will remain closed until the works are complete.

**Location:** Works will be undertaken on Overway Bridge Road, Gawler (refer to map overleaf).

**Traffic management and detours:** The following traffic and pedestrian management will be in place during these works:

- Overway Bridge Road in the vicinity of the work zone will be closed to traffic in both directions during night works only with a detour in place via Barnett Road, Main North Road and Adelaide Road. Overway Bridge will reopen to traffic each day after night shift.
- Pedestrians will be detoured via the Gawler Railway Station pedestrian crossing between Dean Street and Eighteenth Street until the completion of works.

Please observe signage, speed restrictions and directions from traffic controllers.

**BUILDING  
WHAT MATTERS**

**What you can expect:** Construction plant and equipment including a crane and other construction vehicles will be used on site. Some noise and vibrations may be experienced from construction machinery. The work will be managed to minimise disturbance to nearby residents and businesses as much as is practically possible
