

Brighton Road and Edwards Street Junction upgrade

Utility services relocation

Thank you to everyone who took the time to share their views on the proposed concept design for Brighton Road and Edwards Street Junction.

All feedback received from the community was reviewed. The concept design has been updated to retain the Pedestrian Actuated Crossing (signalised push-button crossing) on Brighton Road, south of Gregory Street. In response to community feedback, this crossing will be sequenced with the new junction to manage traffic flow. Please refer to the updated concept design over the page.

Prior to major construction commencing in the coming months, service relocation works are required.

Utility services relocation works

As part of this upgrade, service relocation works will now occur at various locations on and around the junction. Works will include the relocation of telecommunications infrastructure, relocation of SA Power Networks infrastructure and APA Gas Works.

Individual service providers, including SA Power Networks and Telecommunications providers, will advise separately of any potential interruptions to services during these works.

These works are planned to start on **Wednesday, 26 April 2023 with completion in late June 2023, weather permitting**. The majority of these works will be undertaken during the day between 7am to 7pm, Monday to Saturday. To safely undertake these works, some night works may be required. Night works will be undertaken from Monday, 15 May 2023 to early June 2023 from 7pm to 6am.

The junction will remain open to traffic at all times, however temporary lane and speed restrictions will be required when workers are on site. Temporary footpath detours may also be required. Where required, signage will be in place to direct pedestrians and cyclists to alternative access and/or detours. Bus stops will not be impacted.

Please take extra care when workers are on site. Observe traffic management signs, speed limits, lane restrictions and traffic controllers when travelling through the area.

Some noise disturbance can be expected at times while these works are completed, however the work will be managed to minimise disturbance to nearby residents and businesses as much as practically possible. Where night works are required, this will include scheduling intrusive works during the early evening where possible.
