

# Rosewater Railway Loop

## Asbestos Removal Works

The South Australian Government has committed to converting the disused railway line through Rosewater and Ottoway into a green open space for the community.

The Rosewater Loop project extends from the Outer Harbor Greenway on Russell St to the existing path near McNicol Street, Rosewater. It is approximately 3km in length and follows the rail corridor through Rosewater and Ottoway and the former Gillman Railyards.

Ultimately, it will better connect the suburbs of Rosewater, Ottoway and Gillman with the Outer Harbor Greenway, Port Adelaide centre and the new Port Dock railway station; provide improved access to land for the communities of Rosewater, Ottoway and Gillman; and enable long-term retention of the rail corridor.

### What's happening:

We are undertaking asbestos removal works along various sections of the Rosewater Railway Loop between the Outer Harbor rail line near Russell Street and Eastern Parade.

### How this affects you:

To safely facilitate these works, some sections of the Rosewater Loop between the Outer Harbor rail line near Russell Street and Eastern Parade will be temporarily closed. Please take extra care when travelling through the area and observe signage.

### For further information:

- Visit [www.dit.sa.gov.au](http://www.dit.sa.gov.au)
- Contact the project team via email at [DIT.Engagement@sa.gov.au](mailto:DIT.Engagement@sa.gov.au)
- Call 1300 794 880

#### When

Thursday 23 January for approximately one week, weather permitting

No works will be undertaken on the weekend or public holiday

#### Hours of operation

8:30am – 5:00 pm

Monday - Friday
