

# Ovingham Level Crossing Removal

## Night works

As part of the early design process for the Ovingham Level Crossing Project, survey and site investigation works to identify the location and depth of utility services will be undertaken within the rail corridor at Ovingham on **Friday, 22 May 2020**.

**Please note there will be no disruptions to passenger services during these works.**

### Hours of work:

- Between 12:00am and 2:30am (outside of passenger train services hours).

### Location of works:

- Within the rail corridor, adjacent to Noble Street, Ovingham.

As a part of the works, a truck and several light vehicles will be parked at the end of Noble Street, adjacent to the rail corridor.

Some noise disturbance can be expected at times while these works are completed, however the work will be managed to minimise disturbance to local residents as much as practically possible.

Pedestrian access will not be affected, and access to residences in the area will be maintained at all times. There is no change to passenger train services.
