

Wynn Vale Drive and Bridge Road Junction

Project Update

We are upgrading the junction of Wynn Vale Drive and Bridge Road in Gulfview Heights. This forms part of the State Government's election commitments to upgrade, or investigate potential upgrades, in the northern suburbs to improve safety, access and make travel easier for all users.

Community engagement

Thank you to everyone who has provided feedback about this project. Local insights gathered throughout this process supported a need to improve road safety, congestion and travel times, as well as pedestrian safety at the junction. This feedback, along with input from key stakeholders and technical data, has been used to help inform the development of the final design. This final design for the upgrade is now available. Please see over the page.

The final design includes:

- Installing traffic signals at the junction (including signalised pedestrian crossings and new CCTV)
- Indenting Stop 43C Bridge Rd - West and East
- Introducing a dedicated right turn lane from Bridge Road into Melville Road
- New and upgraded footpaths, line marking, kerb and gutters and road surface.

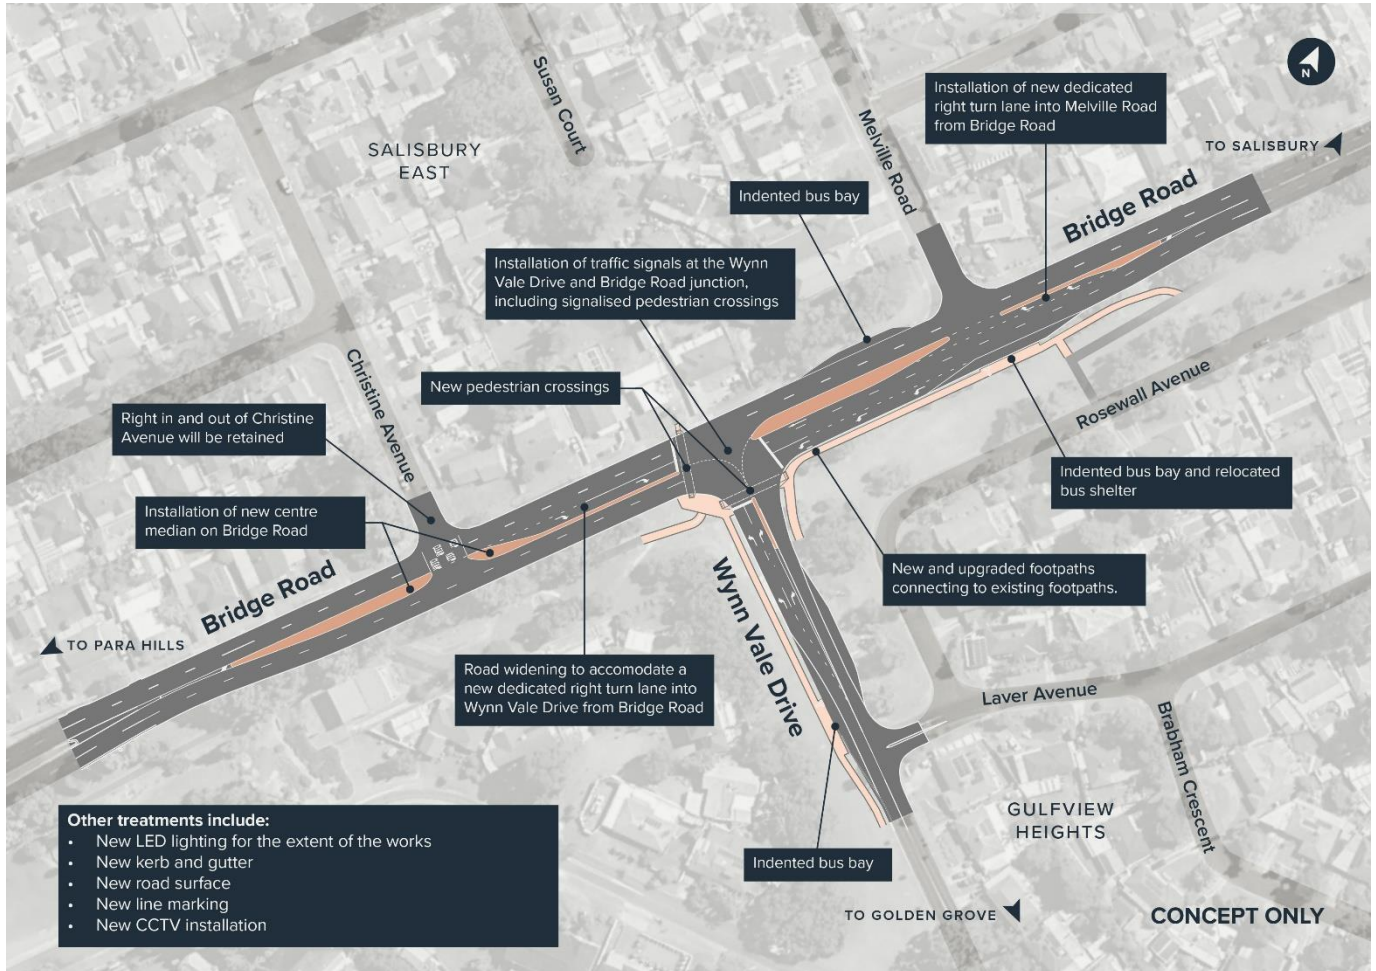

Right turn movements into and out of Christine Avenue will now also be retained. 'Keep Clear' markings will be installed at the junction.

Government
of South Australia
Department for Infrastructure
and Transport

Updated design

Based on the feedback received on the initial concept design, we have made some changes to the design. These changes include indenting bus bays to improve traffic flow and retaining the right turn into Christine Avenue from Bridge Road.

Construction timing

Early works, including modification of SA Water infrastructure, is expected to commence in the second half of 2024. Major construction on the upgrade will commence in late 2024, with overall completion expected in mid - 2025. Advance notice will be provided before works commence.
