

DPTI Procurement & Contracting

Contractor Prequalification Scheme

The Provision of Workzone Traffic Management – Guidelines, Conditions and Application Form

INTRODUCTION

Companies wishing to:

- tender for the provision of workzone traffic management for the Department of Planning, Transport and Infrastructure (DPTI), or
- work as a workzone traffic management subcontractor on DPTI major roadworks contracts,

must first have workzone traffic management prequalification with DPTI.

This system is primarily aimed at companies who specialise in the provision of workzone traffic management. Companies who are prequalified with DPTI for the construction of roadworks, bridgeworks and / or bituminous works and self perform workzone traffic management at their own worksites do not need to be prequalified under this system.

Once prequalified, companies are subject to ongoing review by DPTI to ensure that the information submitted in their application remains valid and that they have performed satisfactorily when awarded contracts.

The purpose of the prequalification scheme is to minimise risks to DPTI and to reduce the effort of individual companies at the time of tender. The scheme aims to facilitate, but not replace, tender assessment for individual projects.

Companies are invited to apply for prequalification by completing the application form (available from http://www.dpti.sa.gov.au/contractor_documents/prequalification)

and attaching the information described in Part 2 “Information to be Submitted and Assessment Criteria”.

The Application Form and Attachments must be submitted in accordance with the instructions on the Application Form.

Enquiries may be directed to:

DPTI.Pregual@sa.gov.au
