

# Fullarton Road and Cross Road Intersection Upgrade

Dear Resident/ Property Owner/ Business Owner

The Australian and South Australian Governments have announced \$ 61 million joint funding for the upgrade of the Fullarton Road and Cross Road intersection, with the cost shared equally.

The Australian Government commitment is part of the Commonwealth Urban Congestion Fund. The State Government's contribution addresses recommendations of the State Government's Keeping Metro Traffic Moving Report. The report identifies this intersection as a priority location for treatments that address road congestion and keep traffic flowing

Approximately 60,000 vehicles travel through this intersection each day and is currently at operational capacity with travel time delays in peak periods.

Historical crash data indicates 44 crashes over the last five years (2013-2017) of which there were 19 casualty crashes.

Cross Road forms part of Adelaide's Outer Ring Route, with both roads serving as important commuter routes for traffic to and from the Mitcham Hills Area and South Eastern Freeway.

The upgrade will:

- Improve travel times
- Improve safety for all users
- Improve network reliability
- Improve economic productivity

Community and stakeholder engagement forms an important part of this upgrade and as planning progresses there will be extensive consultation with land owners, businesses and residents to help inform the preferred concept and design.

Early works are planned to start in 2020, with project completion expected in 2023.

## Have your say

Stakeholder and community engagement forms an important part of the planning study and we encourage you to have your say (see our contact details below).

We will consider all feedback and concerns as we conduct the wider investigative process to identify solutions that balance the needs of various stakeholders.
