

Future AGFMA Soft FM Update

Hi All,

Further to my email last week advising the state government has entered into a contract with Ventia Australia Pty Ltd (Ventia) for the Future Across Government Facilities Management Arrangements (AGFMA), I want to provide the following additional important information.

Under the new model, Soft Facilities Management services including cleaning, waste management, hygiene, pest control, security patrols and garden maintenance that are included in the current contract will not be delivered via the Future AGFMA when the new arrangements commence on 1 December 2021.

These services will be able to be procured directly by the agencies and or sites and where existing long-term contracts are in place, agencies are able to have them novated for them to manage directly. This will mean that where you currently perform works on behalf of an agency you will be able to continue to do so under a different mechanism.

If you currently deliver Soft FM services and require additional information please email the Future AGFMA Team on the below address.

DIT.FutureAGFMA@sa.gov.au

Best regards,

Simon Morony

Executive Director, Across Government Services
