8 CONTRACT DOCUMENTS

Delete Clause 8 and substitute the following:

“8.1 Rules of Construction

- (b) notwithstanding Clause 8.1(a):
 - (i) where inconsistent levels of quality are required, the higher level of quality shall apply;
 - (ii) figured dimensions shall take precedence over scaled dimensions; and
 - (iii) drawings made to larger scales shall take precedence over drawings made to smaller scales;
- (c) where the requirements of quality or any aspect of the work under the Contract is not expressly specified or depicted, the quality shall be consistent with the intended purpose of the Works; and
- (d) drawings showing particular parts of the work under the Contract shall take precedence over drawings for more general purposes,

and in all cases, the interpretation to be followed by the Contractor will be as reasonably determined by the Superintendent.

Where the Contractor considers that there is any ambiguity or discrepancy between the Contract Documents, it shall promptly advise the Superintendent in writing, who shall give the Contractor a direction as to the interpretation to be followed.

Where the Principal or the Superintendent considers that there is any ambiguity or discrepancy between the Contract Documents, the Superintendent shall give the Contractor a direction as to the interpretation to be followed.

8.2 Errors in Design Documents

Where there is any error, omission, ambiguity, inadequacy or deficiency (“Error”) in the Design Documents (including where the Design Documents fail to satisfy the Principal’s Project Requirements), then the Contractor shall:

- (a) rectify the Design Documents and the work under the Contract at no cost to the Principal;
- (b) have no Entitlement as a consequence of such Error; and
- (c) indemnify the Principal for any costs, losses and expenses which are incurred by the Principal as a consequence of the Error.

8.3 Supply of Documents by Principal

The Contractor must give notice in writing to the Superintendent of any instruction, document, drawing, detail or other matter which it properly requires from the Principal or the Superintendent for the performance of the Works. Any such notice must be given separately in respect of each such instruction, document, drawing, detail or other matter required by the Contractor, and must not be given prematurely or be required to be addressed by the Superintendent earlier than a reasonable time in advance of the time by which such instruction, document, drawing, detail or other matter is reasonably required for the proper performance of the Works.

Where the Contractor fails to give notice in the manner required by this Clause 8.3, any delay to the Works arising from any failure by the Principal or by the Superintendent to provide any such instruction, document, drawing, detail or other matter to the Contractor is not a ground for extension of time for Practical Completion or for adjustment of the Contract Sum.

8.4 Supply of Documents by Contractor

(a) Preparation and Submission of Design Documents

The Contractor must in undertaking and completing the Contractor's Design Obligations and the design for the Works prepare such Design Documents as are necessary or desirable to carry out the Works. The Contractor must provide 5 copies, or such other number as the Superintendent may specify, of the Design Documents to the Superintendent as soon as reasonably practicable after their preparation and in any event 40 days prior to the intended date or time when construction of that part of the Works is to be commenced.

If the Contractor elects to continue with the Works the subject of the Design Documents prior to:

- (i) the Superintendent approving those documents; or
- (ii) deemed approval under Clause 8.4(c),

and the Superintendent subsequently rejects the Design Documents within 28 days of the Superintendent's receipt of the Design Documents, the Contractor must take all necessary steps to ensure the Works comply with the approved Design Documents (including demolishing any Works which have not been approved) at the Contractor's sole risk and cost.

(b) Design Documents to comply with Contract

The Contractor must ensure that Design Documents submitted to the Superintendent are accompanied by certification in the form in Attachment 11 from the relevant Consultant or the relevant sub-consultant of the Consultant that the design meets the requirements of the Principal's Project Requirements and Legislative Requirements.

If the Superintendent notifies the Contractor of its rejection of any Design Documents within 28 days of the Superintendent's receipt of the Design Documents, the Contractor must revise the Design Documents and submit revised Design Documents to the Superintendent.

(e) No Contract Sum adjustment due to Disapprovals

The Contractor is not entitled to:

- (i) an adjustment to the Contract Sum; or
- (ii) any adjustment to the Date for Practical Completion,

for any change or revision due to any rejection by the Superintendent under Clause 8.4(c) if the Superintendent is of the reasonable opinion that such change or revision was necessary as a result of any error or failure of the Design Documents to comply with the requirements of the Contract or any reasonable requirements of the Principal previously notified in writing to the Contractor.

(f) Effect of Approval

The Principal and the Superintendent are not bound to review or comment upon the Design Documents or to check the Design Documents for errors, omissions or compliance with the requirements of the Contract.

The Principal's or the Superintendent's receipt of, or review of, or comment on, the Design Documents and any other documents provided by the Contractor, will not relieve the Contractor from responsibility for the Contractor's errors or omissions or departure from the Contractor's

Design Obligations or other requirements of the Contract or give rise to any Entitlement on the part of the Contractor.

An approval of Design Documents or an authorisation to proceed with construction under this clause or any other provision of the Contract by the Superintendent does not amount to an acceptance that the Design Documents comply with the Contract and will be construed as an authorisation to proceed.

8.5 Contractor's Design Obligations

The Contractor:

- (a) acknowledges that the design contained within the Preliminary Design is not intended to be a fully resolved design for the Works;
- (b) acknowledges that the Principal is relying upon the advice, skill and judgment of the Contractor to review and develop the Preliminary Design, and to undertake and arrange the proper co-ordination and finalisation of the design of the Works in accordance with the Contractor's Design Obligations, to meet the Principal's Project Requirements and to enable the proper and efficient construction of the Works;

- (c) the Contractor:
 - (i) demonstrates to the satisfaction of the Superintendent and the Principal (acting reasonably) that the design amendment is minor, otherwise complies with the requirements of the Contract, is consistent with the design intent in the existing design and does not result in a lessening of any standard, level of service, scope or requirement for any work set out in the existing design, including any reduction in:
 - (A) capacity;
 - (B) durability;
 - (C) maintainability;
 - (D) aesthetics of visible features;

Where the Contractor proposes a design amendment in accordance with this Clause 8.7, the Superintendent may, in its absolute discretion, by written notice to the Contractor:

- (b) it will not be entitled to claim any additional cost or expense or any adjustment to the Contract Sum associated with any costs it incurs arising out of or in connection with the development of any proposed design amendment and the Contractor's compliance with this clause irrespective of whether or not the Superintendent or Principal accept the proposed design amendment; and
- (c) any notices, submission, review, rejection, acceptance, request for an amended design amendment or resubmission of a proposed design amendment, will not:
 - (i) relieve the Contractor of its responsibility to properly program and execute the Works and to bring the Works to Practical Completion by the Date for Practical Completion; or

Where the contract requires certain parts of the work to be undertaken by subcontractors registered in the Department Prequalification System, the refusal of the Superintendent to approve a subcontractor shall not be deemed to have been unreasonably withheld if the subcontractor proposed is not registered in the Department Prequalification System.

Within 14 days after a request by the Contractor for approval, the Superintendent shall advise the Contractor of approval or the reasons why approval is not given.

Approval may be conditional upon the subcontract including—

For the purpose of effecting such novation only, the Contractor hereby irrevocably appoints the Superintendent to be the Contractor's attorney with authority to execute such documents as are necessary to give effect to the novation and to bind the Contractor accordingly; and

The Contractor shall use its best endeavours to ensure that each such warranty is capable of assignment to any successor in title of the Principal and shall ensure that each such warranty is on normal commercial terms in accordance with industry standards and is of the type typically obtained by a principal in the position of the Principal for projects of the size and value commensurate with the Project.

Where any subcontractor or supplier has provided warranties or guarantees in relation to any work, plant, equipment or material incorporated into the Works (other than work and materials identified in Attachment 8 in relation to which the preceding paragraph applies) which have not expired within 10 Business Days after the expiration of the Defects Liability Period then—

 - (ii) have an impact on whether the Works are fit for their purpose;

- (iii) materially affect the end user requirements, including but not limited to performance, life cycle costing, operational requirements, functionality, warranties and maintenance requirements,

12 LATENT CONDITIONS

Delete Clause 12 and substitute the following:

“12.1 Notification

If during the execution of the work under the Contract, the Contractor encounters on the Site or its surroundings physical conditions (other than climatic conditions or conditions arising from climatic conditions) including artificial obstructions, which the Contractor considers:

- (a) differ materially from the conditions which would have been ascertainable by the Contractor if the Contractor had:

If the Superintendent determines that the physical conditions are physical conditions to which Clauses 12.1 applies and:

- (a) the Superintendent considers that a variation to the work under the Contract is necessary, the Superintendent must, upon making the determination, order a variation under Clause 40 of the General Conditions of Contract;

- (b) the Superintendent does not consider that that a variation to the work is necessary but is satisfied that the physical conditions have or will cause the Contractor to unavoidably incur more cost than the Contractor could reasonably have anticipated at the time of tendering, the Superintendent must determine that a valuation must be made under clause 40.5.

12.4 Time Bar

In making a valuation for the purposes of a variation ordered by the Superintendent under Clause 12.3 or a determination under clause 12.3(b), regard shall not be had to the value of additional work carried out, additional Constructional Plant used or extra cost incurred more than 28 days before the date on which the Contractor gives the written notice required by Clause 12.1.
