

Clarence Park Station

Pedestrian ramp upgrade

The State Government is upgrading Clarence Park Railway Station. The first part of these works will involve an upgrade to the station's access ramp adjacent to the East Avenue level crossing.

What's happening:

This first stage of works include:

- construction of retaining walls at the northern end of the station platform to allow a longer access ramp to be created;
- relocation of existing light poles, and platform electrical services;
- installation of new balustrade around the retaining wall; and
- installation of new tactiles pavers.

How this affects you:

During these works, **access to the station will be via the stations southern access only.**

Pedestrians and cyclists are asked to take care when travelling through the area. The map overleaf provides more details.

Day and night works will occur during this time and temporary lighting towers will be used at night along the platform to ensure safe working conditions for the team.

Some noise disturbances can be expected at times while these works are completed, however, we will try to minimise disturbance as much as practically possible.

When

From Monday 15 January until late February 2024

Hours of operation

Day Works: 7am to 5pm

Night Works: 7pm to 7am

Where

Clarence Park Railway Station

Government
of South Australia

Department for Infrastructure
and Transport

OFFICIAL

At times we will need to restrict some parking along Parker Terrace, Canterbury Terrace and East Avenue.

We will maintain access to properties and make every effort to minimise impacts to surrounding properties and road users.
